Comments on Statement of Reasons for Allowance

On page 2 of the Examiner's Notice of Allowability, the Examiner has indicated that no prior art was found that "Bolgiano et al. teach a wireless telephone distribution system with time and space diversity transmission for determining receiver location. The prior art of record does not teach time space

measuring means for measuring time spaces between sampled values of a delay profile sampled along a delay time axis; leading position detecting means for detecting a position of a sampled value immediately after a maximum time space from among time spaces measured by said time space measuring means as a leading position; and a leading wave position detecting means for detecting an initial peak position of the sampled values after the leading position detected by said leading position detecting means as a leading wave position.”

Applicants respectfully submit that the claimed invention as set forth in each of the independent claims and the dependent claims must be read as a whole, and not as a single feature or subcombination of features which represent less than the entirety of the claimed invention as a whole. While a particular feature or subcombination of features referred to by the Examiner in the Statement of Reasons for Allowance may represent a basis for distinguishing the claimed invention over the prior art, Applicants further submit that this may not necessarily be the *sole* ground for distinguishing the claimed invention over the prior art of record. Accordingly, the Examiner’s statement should, in Applicants’ view, not be read as constituting or meaning that the invention can or should be reduced to a single “feature” of the invention or to a subcombination of features that is less than the entire invention claimed as a whole, nor that the single feature referenced by the Examiner or subcombination of features referenced by the Examiner in the Statement of Reasons for Allowance is the only or sole grounds for distinguishing the invention over the prior art of record.

Please address all future correspondence in connection with the above-identified patent application to the attention of the undersigned.

Dated this 8th day of March 2005.

Respectfully submitted,
